Skills

Management & Leadership

Cross-functional collaboration

Performance reviews / 1:1s

Team restructuring

Career development

Backend architecture (Node.js, microservices)

AI-driven engineering

Cloud & infra (AWS, Docker, Kubernetes)

CI/CD (Gitlab CI)

Databases & messaging (MySQL, RabbitMQ, Elasticsearch, Redis)

Testing strategy (unit/integration/e2e, TDD, CI-integrated regression suites)

Hobbies

Travel & cultural discovery

Cinema & music

Literature, Tennis & sports

Languages

French

English

Arabic

Profil

As an Engineering Manager, I lead a cross-functional squad comprising frontend, backend, mobile, and DevOps engineers. My role focuses on aligning technical execution with business objectives, fostering collaboration across disciplines, and delivering impactful solutions. I am deeply invested in team growth, ensuring individuals thrive in their careers through mentorship, regular feedback, and tailored development plans. My experience includes designing scalable systems, implementing efficient workflows, and championing best practices to maintain high-quality deliverables while meeting deadlines.

Employment History

Engineering Manager, Kolecto, Paris

JAN 2026 — PRÉSENT

- Led an engineering squad (Prescription & Intelligence Hub) at the product-engineering interface
- Designed and delivered the Hub, a generic prescription service centralizing all prescription flows across the company
- Restructured the team around the new architecture
- Drove AI adoption across the development lifecycle — automated PR review, documentation generation, industrialized test generation, AI-generated regression tests, and anomaly detection — cutting PR review time by 30%, reducing test-writing effort by 40%, and generating 70% of regression test coverage automatically

Engineering Manager, LALALAB, Paris

MARS 2023 — DÉC 2025

- Managed a cross-functional squad of 7 engineers (backend, mobile, DevOps), aligning delivery with business priorities
- Oversaw architectural design reviews, ensuring robust technical solutions and high-quality standards
- Mentored and coached engineers through career development, feedback cycles, and annual reviews, strengthening team performance and retention
- Partnered with stakeholders to refine technical roadmaps and deliver impactful features under Agile/Kanban practices
- Led hiring and onboarding, growing the team from 3 to 7 engineers, and drove annual reviews to foster a high-performance engineering culture

Lead Backend Engineer (Nodejs), LALALAB, Paris

MARS 2020 — MARS 2023

- Led a backend team of 4 engineers, driving architectural decisions, code reviews, and delivery of scalable services.
- Migrated critical modules (payments, cart & pricing, order management) from legacy monolith to microservices on AWS, improving system resilience
- Designed and implemented coupon, promotions, and delivery pricing logic, ensuring scalability and accuracy.
- Ensured quality through unit and integration tests with Jest, reducing regressions in production.

Backend NodeJs Developer, JIN, Paris

JAN 2018 — FÉV 2020

- Designed and implemented microservices architecture and Node.js APIs.
- Led technical choices, deployment, and provisioning, supporting Agile/Kanban delivery.
- Built and maintained the Plugr backoffice for media and influencer monitoring.

Education

Bachelor of Engineering in Computer Science, ESPRIT, Tunis

SEPT 2012 — JUIL 2018

Bachelor of Engineering in Computer Science – Specialization in Backend Development & Server Technologies

- Focused on distributed systems, backend architectures, and server-side optimization.
- Developed strong foundations in databases, networking, API design, and cloud infrastructure.

Courses

AWS Certified Solutions Architect Associate, AWS

2025

Leadership, Team Management, and Conflict Resolution, Forentem

JAN 2023
